We are in total support of the opening of the Copper Flats project. I grew up here in Hillsboro. All of us knew that without the mines there would be no commerce here in Sierra county. The town, the county and the entire state is dying as there are only service jobs available. Oh, by the way NM is also known for the high death rate due to prescription and non-prescription drugs. We also have the title of being a death spiral state; no jobs, nothing. The project in question is the only thing that may start turning us around.
